

National Multiplier Events Report

ACTION - enhAnCe short-term employability Of immigrants

Project ID: 2020-1-DE02-KA202-007390

Organising partner	PRISM
Date and venue of the 4 MEs	15.04.2023 21.04.2023 27.04.2023 28.04.203
Total number of participants	53

Please, briefly describe, how the event was organised: (e.g. presentations, workshops, activities, etc.).

In Italy, PRISM has implemented 4 multiplier events with the aim of involving a variety of people and stakeholders, interested in the short-term employability of migrants. In total, 53 people in presence and 6 people online were informed.

On 15.04.2023 the ME n.1 was organised at Villa Tasca in Palermo, in collaboration with the Legambiente Sicilia Tourism Network (it's an organisation active at national level for the promotion of ecotourism and experiential tourism). During the discussion, ACTION resources were presented, with a particular focus on tourism modules. Tourism represents a great employment opportunity for migrants in Sicily. The choice of the meeting venue was not accidental, being Villa Tasca a large park where several associations implement many activities on experiential tourism, workshops on sustainability etc.

On 21.04.2023 the ME n.2 was organised at PRISM, involving educators working in different local associations and dealing with migrants. 6 people participated online too. The debate focused on how to foster the acquisition of basic skills by migrants and which transversal skills (from the ACTION training modules) can be further promoted among migrants.

On 27.04.2023 the ME n.3 was organised at Asante Association in Palermo. This association welcomes around 140 migrants (coming mainly from Senegal, Mali, Guinea, Pakistan, Bangladesh) and it employs several educators, social workers, psychologists, lawyers to support migrants. Both educators and migrants participated in the discussion held by PRISM. All participants were involved in a plenary session (project presentation) and then, they were split into smaller groups to discover more about social media. The discussion and presentation of ACTION project were carried out in English and French.

On 28.04.2023 the ME n.4 was organised at the Cooperativa Liberamente in Palermo. It's a local association that manages several centers for migrants and newcomers in Sicily. A smaller group of educators and migrants was informed about the project and its main results.

Agenda of the MEs in Sicily:

- Presentation of the ACTION project: objectives and activities
- Presentation of the ACTION training modules and the online platform
- Workshop on social media
- Feedback from the participants and brainstorming session

Main feedback from the participants:

- *I would like to know more about Erasmus+ and how to involve migrants in tourism*
- *I would like to talk with migrants, know more about their work experience in tourism*
- *ACTION training modules are very interesting and deal with current issues, very innovative and future-oriented materials*
- *It would be interesting to implement computer courses with migrants and include ACTION programming language module*
- *The choice of Villa Tasca was very suitable for the topic*
- *The content was good but being the conference in an open space, some problems of audio/ video reception may occur*
